

The ABCs of PowerG

The leading wireless security technology for today's homes and businesses.

A LONG RANGE

Devices communicate up to 2km/1.24 miles line-of-sight, which is **4X** the distance of traditional wireless.

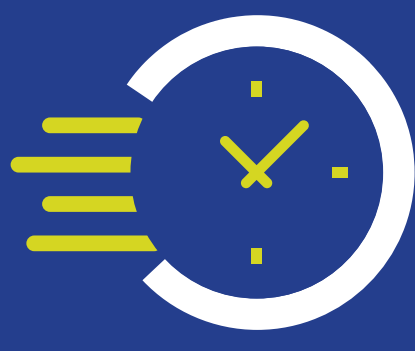

Adaptive transmission technology which automatically sets transmission power to the minimum.

As a result, **B**attery life is maximized and service costs are reduced.

SPEED OF INSTALLATION

B

PowerG is the power of wires, without the wires. More secure. More convenient. More profitable.

NO DRILLS

NO WIRES

NO MESS

Just the simplicity and speed of wireless se**C**urity installation.

C ENCRYPTION

Two-way 128-bit AES advanced encryption to protect you from devious intruders and hackers.

Frequency Hopping Spread Spectrum (FHSS) & Time Division Multiplexed Access (TDMA) ensure the dependability and security of communications.

Reduce lost alarm messages. Reduce false alarms.

Cut the wires and plug in peace of mind with

PowerG
